TILE ADHESIVE

Fortress Tile Adhesive is a special cement - based adhesive formulated specifically for ceramic floor and wall tiles, interior and exterior applications. It is composed of highest quality of Portland cement, natural sand fillers and chemical additives.

Coverage (approx):	Packaging
3.00 sqm	25kg / bag

HEAVY DUTY ADHESIVE

Polymer modified mixture of high grade Portland Cement and fine Silica Sand for Superior Adhesion and Flexibility in a medium-bed setting. Used for walls and floors for all types of natural and manufactured stones.

Coverage (approx):	Packaging
3.00 sqm	25kg / bag

SKIM COAT SUPERFINE WHITE

FORTRESS SKIM COAT SUPERFINE WHITE is a specially formulated skimcoat mixture designed for thin plastering applications. It offers excellent non-sag properties that provide easy application for overhead and wall areas.

Coverage (approx):	Packaging
20.00 sqm	20kg / bag

SKIM COAT SUPERFINE GRAY

Complementing our Superfine White, The Superfine Gray is used to cover pinholes, imperfections and uneven surfaces. Excellent compatibility to mortar paints, eliminates cracks, chipping and flaking. Delivers smooth light gray finish of your walls at a lower cost.

Coverage (approx):	Packaging
20.00 sqm	20kg / bag

JOINTING COMPOUND

A specially formulated mixture designed for thin jointing applications. It offers excellent non-sag properties that provide easy application for overhead and wall areas.

Coverage (approx):	Packaging
20.00 sqm	20kg / bag

FORTRESS DIAMOND SEAL

Penetrates surface to form a "wet look" protective barrier to prevent discoloration, stains and mold formation. Formulated with advance flouropolymers to protect surface while allowing it to breathe and release moisture vapors

Coverage (approx):	Packaging
5.00 sqm to 8.00 sqm	1 Liter Container
20.00 sqm to 32.00 sqm	4 Liters Container
100.00 sqm	18 Liters Container

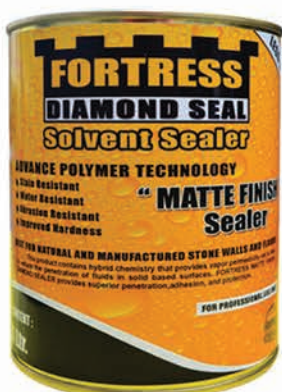

FORTRESS NON SLIP DIAMOND SEALER

FORTRESS NON SLIP DIAMOND SEALER provides beautiful high gloss acrylic protection with a non slip finish to increase surface traction for concrete, natural stone and tile flooring. This super-tough film gives a strong grip coating, resists chemicals, is abrasion resistant and prevents stains. For use on porous materials, a clear non-yellowing sealer that resists tough oils, water and acid indoors and outdoors while preventing slips and falls. Our deep bonding formula, resists peeling, cracking, uv degradation and efflorescence.

Coverage (approx):	Packaging
5.00 sqm to 8.00 sqm	1 Liter Container

FORTRESS DIAMOND SEAL "MATTE SEALER"

FORTRESS DIAMOND SEAL MATTE SEALER provides less shine acrylic protection to natural, manufactured stone walls and floors and decorative stamped concrete. This super-tough film gives a rich "MATTE FINISH" appearance, resists chemicals, abrasion and stains. For use on porous materials, a clear non-yellowing sealer that resists tough oils, water and acid indoors and outdoors. Our deep bonding formula, resists peeling, cracking, uv degradation and efflorescence.

Coverage (approx):	Packaging
5.00 sqm to 8.00 sqm	1 Liter Container

FORTRESS PENETRATOR

High Performance Water - Based Sealer that provides heavy duty protection for natural and manufactured stones. Improves abrasion resistance. One component solution makes easy to use for all finishing works.

Coverage (approx):	Packaging
5.00 sqm to 8.00 sqm	1 Liter Container
20.00 sqm to 32.00 sqm	4 Liters Container

WATER BASED SEALER

An acrylic sealer that provides heavy duty protection for natural and manufactured stones.

Coverage (approx):	Packaging
4.00 sqm to 8.00 sqm	1 Liter Container
