

GT STONE WORKS®

TEXTURED WALL PANELS

Innovative Architectural Finishes for walls

PRODUCT SPECIFICATION:

Instant wall finishes are made possible with GT Textured Panels.

Each panel can be cut using ordinary tools to custom fit your desired area.

All panels are sold per square meter.

Cut Size: 1200mm x 800mm x 3mm

Max Size: 1.20 x 2.4M

Material: Made from durable and lightweight 3.00mm PVC Panels

Design and Color: Choose colors and textures from our existing lineup or customize your walls with your own design and preference.

From smooth to industrial, marble, travertine and textured finishes, our textured panels are installed in just a few minutes with no downtime for wall preparations, applications and cleanup. We offer our own adhesives to secure and fasten panels to your walls with excellent non-sagging properties and fast curing time.

USES:

Designed for interior use only.

INSTRUCTION:

1. Survey the area and get the size you will need.
2. Make sure all walls are free from dust and debris.
3. Joint lines of 1-3 mm are recommended if multiple pieces are installed.
4. Use box cutter to custom cut the panels and sand the edges to avoid a rough edge finish.
5. Apply adhesives on the perimeter of the back of wall panel and apply on the body of the wall.
6. When fastening, apply pressure to the wall so make sure adhesives stick completely for 3-5 minutes.
